

# **DIGITAL IMAGE STORAGE SYSTEM AND DIGITAL IMAGE STORAGE**

## **Abstract of Disclosure**

A digital image storage system includes a digital camera having a memory capable of storing digital images and an adapter on which the digital camera is to be laid down for informing the adapter of the digital images in the memory. The digital image storage system further includes a data storage having a storage medium that stores the digital images informed through the adapter. The data storage includes a function unit that controls the digital image storage so that the informed digital images are stored in a predetermined folder prepared in the storage medium.
